

1. On your device's home screen, open the **Settings** application.
2. Tap **Mail, Contacts, Calendars**.
3. Tap **Add Account**.
4. Tap **Exchange**. iOS 4.0+ allows multiple Exchange accounts. Enter your full Google Apps email address in the **Email** field and password in the **Password** field and tap **Next**.

5. In the **Server** field, enter **m.google.com** as your server address. Note: To access m.google.com, set the language to **English (US)**.
6. Leave the **Domain** field blank.
7. In the **Username** field, enter your full Google Apps email address.
8. Your password should already be in the **Password** field from step 5. If it's not, enter your Google Apps password in the **Password** field. Tap **Next**.
9. Select the Google services you want to sync, such as Mail, Contacts, and Calendars and tap **Save**. To receive and respond to meeting requests on your device, you need to turn on both **Mail** and **Calendar** and **New events** in your Google Calendar settings. See below for more information.

Congrats! You've set up Google Sync!

Synchronization will begin automatically if you have Push enabled on your device. You can also open the Mail, Calendar, or Contacts app and wait a few seconds to start a sync. Note that if you've recently signed up for Google Apps for Business, Education, or Government, it can take a few hours (up to 24) before you're able to sync with your mobile device.
